Management

Compatible with the Motorola Mobility Suite, which includes: Mobility Services Platform for centralized remote control of your Motorola and non-Motorola mobile devices and peripherals; the Mobile Security Suite, which allows you to add whatever degree of device-level security your business requires — from a firewall to intrusion prevention, enforced authentication, data encryption, mobile VPNs for government grade security and more; App Center which allows you to choose which device features and software applications your users can access; PocketBrowser for rapid and easy development of new applications that incorporate all the data capture features on your Motorola devices; and Terminal Emulation, which allows users to access mainframe applications right out of the box.

SERVICE PLANS

Service

Service from the Start with Comprehensive Coverage — a unique all-inclusive program that sets the standard for post-deployment support by including normal wear and tear, as well as coverage for internal and external components damaged through accidental breakage — significantly reducing your unforeseen repair expenses.

For more information on how you can put the power of mobile computing to work in your DSD and Route Accounting operations, please visit www.motorolasolutions.com/dsdrouteaccounting

ABOUT MOTOROLA SOLUTIONS END-TO-END MOBILITY SOLUTIONS FOR DEPLOYMENT SIMPLICITY AND SUCCESS

Every day, organizations of all sizes all over the world count on our Enterprise Mobility Solutions to maximize personnel effectiveness, improve services and increase revenue potential. When you choose Motorola for your mobility solution, you get the peace of mind that comes with choosing an industry leader as your technology partner. We offer the proven expertise and technology you need to achieve maximum value and a fast return on investment — as well as first hand experience in virtually every size organization in nearly every major industry. And our end-to-end solutions offer the simplicity of a single accountable source — regardless of the number of vendors involved.

Our comprehensive product offering includes: rugged and enterprise class mobile computers with extensive advanced data capture and wireless communications options; rugged two-way radios for always on voice communications; private wide area and local area wireless and outside the four walls — and to network multiple locations; comprehensive RFID infrastructure, including fixed, mobile and handheld RFID readers; a partner channel delivering best-in class applications; software solutions that enable centralized and remote management of every aspect of your mobility solution; and a complete range of pre-and post-deployment services to help get and keep your mobility solution up and running at peak performance every day of the year.
